ANTHROPOCENE

My statement-thinking about the topic Anthropocene:

Timewise? Thinking about now. Mindset - go with the flow, live with the nature.

A big problem of civilised world and mainly a lot of city people is that we forgot to live with the nature and not against it. A lot of people don't have a strong relationship with the nature anymore. If you love it you don't damage it. I'm thinking about everyday life. Sustainability. Living with the ocean. With the soil. With the surfaces. Learning to understand again.

After layers and layers of land and time and changes we have this - and we need to live with it as best as we can and trying our layer to be as kind as possible and - we are temporary and small - layer of garbage and damage as thin as possible. We as a mankind are just a small part of the whole and we should realize that. We should have some respect.

How can I try to make kin with the nature and others? - (Surfing, skateboarding)

Opposited things (artificial X nature ) making one whole again.

City is also a biotope.

Proposal for an installation for the second part of the semester project :

I might like to work on some installation which would somehow work with the topic of contrast transforming into similarity. Shapes? Light? video and object? Shadows? Two different things transforming to the same in their shadows?

popculture reference that I found which I think kind of illustrate how I think about the topic:  
(Movie True spirit)

: Learning getting along with the nature (and other people) through sports and activities such as surfing and skateboarding.

# CROWD WASH

Crowd as a paralel with the ocean and a white wash experiences while surfing.  
When you fight it it is even worse. It just swallows you and hopefully spits out.

Když se vzpouzíš a panikaříš, vyřídí tě a pokoří. Musíš zadržet dech a go with the flow.

I did some templates with an intention to spray it somewhere in the streets perhaps near a skatepark
